

Pacific Conveyor Systems

Donut Hole Injection System

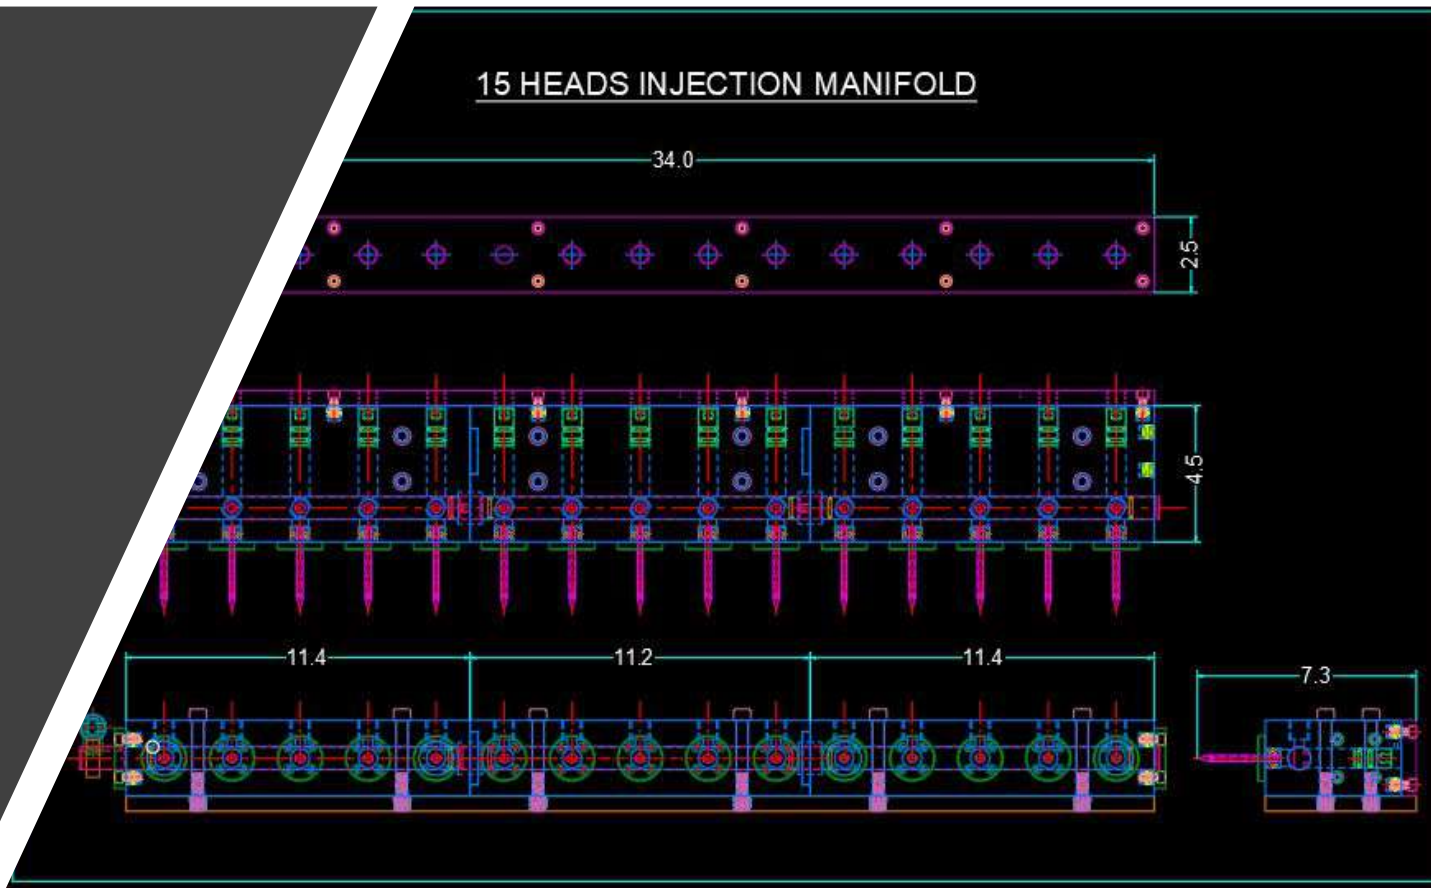

DESIGNED & BUILT IN USA
FOR
ARYZTA-USA & CANADA

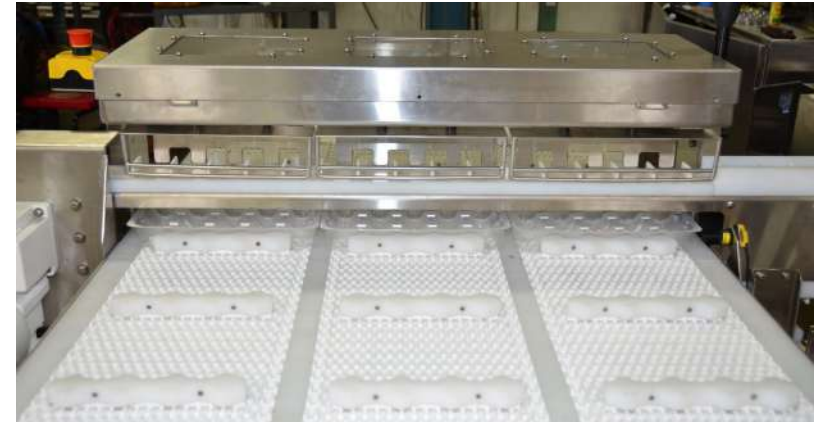

Design Specification:

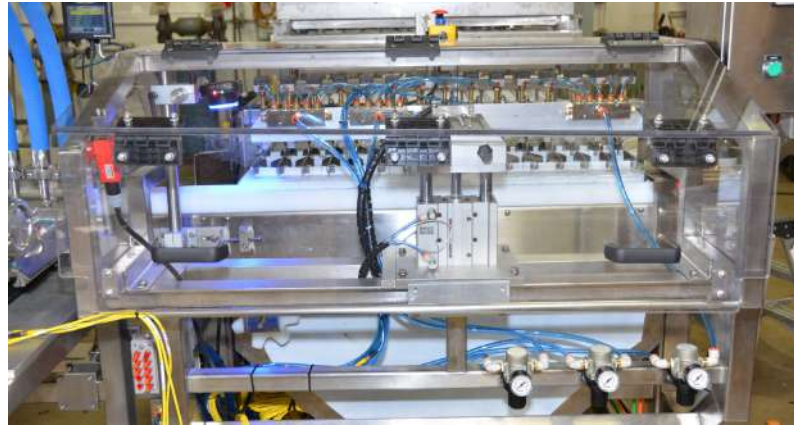

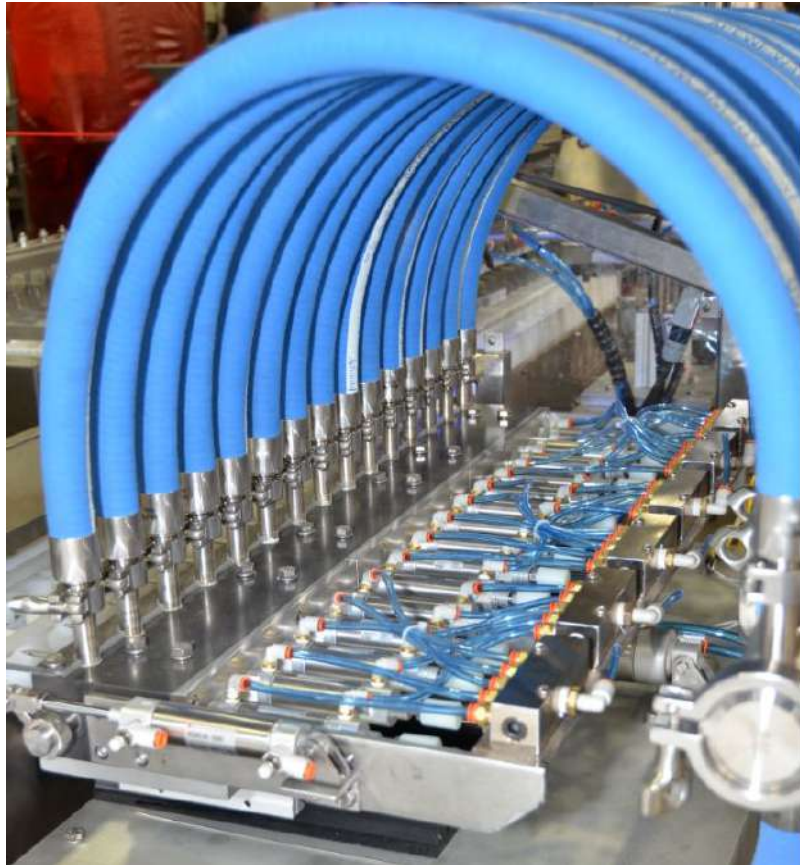

- Inject cream on to Donut Holes at 300 pieces per minute
- Incorporate CIP in the design
- Modular design for easy transportation
- Check quality of product by Vision system prior to injection.
- Load filled Donut Holes into clear plastic trays
- HMI control allow quick setup.

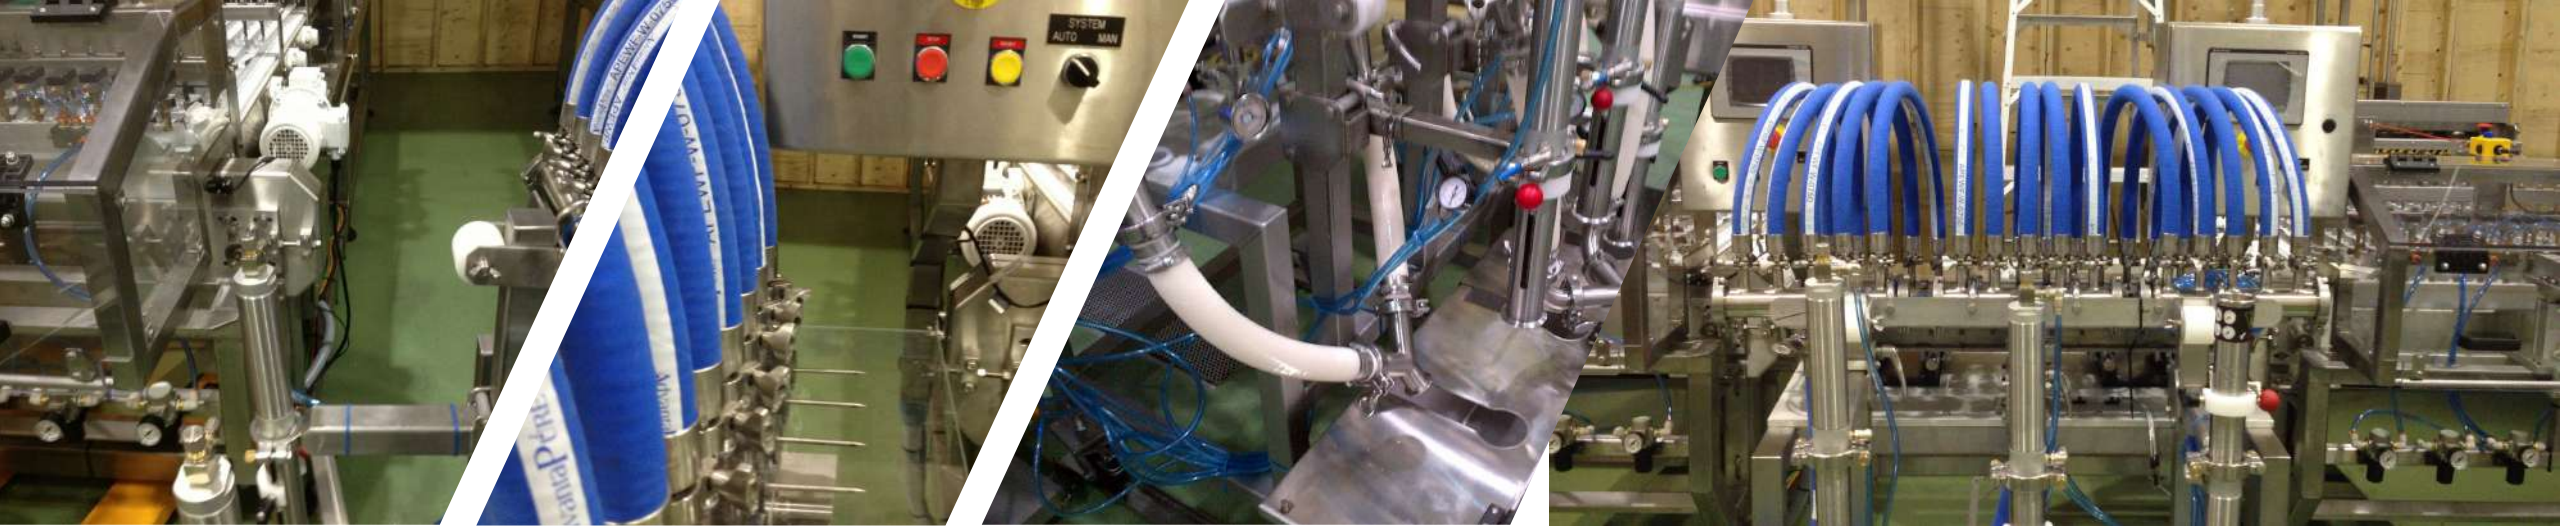

Manufacturing

By a team of experienced Electrical/Mechanical technicians at PCS

Testing

By a team of Electrical and Mechanical engineers

Installation & Support

- Install by PCS' experienced field crew
- Support by a team of Electrical & Mechanical Engineers
